

Corporate Sponsorship Information

Registration as a corporate sponsor would help promote your products in this growing market segment, while helping to offset the costs of the workshop itself, which is operated by an all-volunteer team. This year we are also providing a few student travel awards.

Corporate sponsors are featured prominently on the HEMS website, and will receive ample recognition at the workshop itself. As well, you are invited to provide a corporate poster to display your wares.

For this year's workshop, our corporate sponsorship is \$1250, which includes one attendee registration. The attendee registration can be separated out from the corporate sponsorship, with the corporate sponsorship having a fee of \$750 and the attendee registration having a fee of \$500, to better accommodate corporate spending limits.

If you would like to help sponsor the workshop, but do not have anyone available to attend that week, we can arrange to have your corporate poster posted for you. Simply register as a corporate sponsor-only for \$750, and note that you will be sponsoring but not attending.

Our Corporate Sponsors in previous years have included: Alcatel Vacuum, Ardara Technologies, ASRC Aerospace Corporation, Bruker Daltonics, BURLE Electro-Optics, Detector Technologies Inc., ENG Concepts, First Detect, Hamilton Sundstrand, ICX Griffin Analytical Technologies, Inc., Ionicon Analytik, Ionwerks, Inc., Microsaic Systems, Monitor Instruments, OI Analytical, Pascal Technologies, Pfeiffer Vacuum, Siemens, Smiths Detection, SRI International, Stanford Research Systems, Syagen, Torion, Varian Inc.
